

Hand demagnetizer HD

When to choose a HD handheld demagnetizer:

You can use the HD handheld demagnetizer during mobile demagnetization of large or complex components where you cannot use table or tunnel demagnetizers, such as moulds, bearings, and various machine and mechanical parts, etc. It is an efficient tool where quick and mobile demagnetization is needed.

APPLICATION	TECHNOLOGY	VOLTAGE	DUTY CYCLE	DEPTH OF DEMAG. FIELD
 Demagnetization	 Electro	 230 VAC	 20%	 up to D0 mm

Other important parameters:

Operating time: 10 min.
 Power supply: 230 VAC/50-60 Hz
 (other voltages available on request)

Use:

- + fast mobile demagnetization of small and large as well as complex parts

Catalog number	Active area (mm)	Power input (VA)	Depth of demag. field (mm)	Weight (kg)
HD2	105 x 95	350	max. 40	2,2
