Hand demagnetizer HD

When to choose a HD handheld demagnetizer:

You can use the HD handheld demagnetizer during mobile demagnetization of large or complex components where you cannot use table or tunnel demagnetizers, such as moulds, bearings, and various machine and mechanical parts, etc. It is an efficient tool where quick and mobile demagnetization is needed.

| APPLICATION | TECHNOLOGY | VOLTAGE | DUTY CYCLE | DEMAG. FIELD |
|-----------------|------------|---------|-------------------|--------------|
| | E | | | [<u></u>] |
| Demagnetization | Electro | 230 VAC | 20% | up to 40 mm |

Other important parameters:

Operating time: 10 min.

Power supply: 230 VAC/50-60 Hz

(other voltages available on request)

Use:

+ fast mobile demagnetization of small and large as well as complex parts

| Catalog number | Active area (mm) | Power input (VA) | Depth of demag. field (mm) | Weight (kg) |
|----------------|------------------------|------------------|----------------------------|-----------------------|
| HD2 | 105 x 95 | 350 | max. 40 | 2,2 |
